MZC Series

You asked for the ultimate in multi-zone control and we delivered. We combined our EZC-1.0 Controller, a multi-zone audio and video preamplifier, a multi-channel digital amplifier, and integrated them into a single unit. What we created is a system that is as adaptable as it is powerful.

The combination of an MZC-88, MZC-66 or MZC-64 Multi-Zone Controller and your choice of either MODE or EZ-Pad keypads can meet the demands of any distributed audio setting. The system enables you to power up to eight rooms and access up to eight different source components. Connect your iPod®, DVD, CD or any source of audio or video and control them with the touch of a button.

MZC 88

- 8 Zone, 8 Source Controller/Amplifier/Receiver
- 50 Watts Per Channel x 16 Channels (8 Stereo Zones)
- Two Built-In AM/FM Tuners With a Total of 80 Presets (10 Per Zone)
